**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-16 , drawn to nucleic acid and method of using nucleic acid, classified in class 435, subclass 6.
- II. Claims 17-20, drawn to computer readable medium, classified in class 702 , subclass 19.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions Group I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions. Group I is drawn to nucleic acid and method of probing using nucleic acid and does not depend on computer readable medium containing the sequence data. Group II is drawn to computer medium containing sequence data which may be used for alignment methods.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1656

3. According to the Official Gazette January 7, 1997, pages 1194OG 302-304, up to **ten (10) independent and distinct nucleotide sequences** will be examined in a single application. For claims 1-20 containing more than ten (10) sequences, applicant is required to select ten (10) sequences for examination. The sequences are drawn to different mycobacterium species and strains.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
